Portfolio

PROFESSIONAL SUMMARY

Results-driven Data Scientist with 4 years of demonstrated expertise in transforming complex datasets into actionable business intelligence. Skilled at partnering with product, marketing, and operations stakeholders to frame ambiguous problems as measurable questions, then building the pipelines, statistical models, and ML solutions to support growth and excellence.

CORE COMPETENCIES

Languages & Tools: Python (Pandas, scikit-learn), SQL (PostgreSQL), R, Power BI, Excel, SPSS, STATA
Modeling & Analysis: Statistical analysis, machine learning (classification, forecasting), computer vision (YOLO/CNNs), experimental & survey design, data visualization
Deployment & Collaboration: Git/GitHub, Streamlit, and cloud platform (Azure)

PROFESSIONAL EXPERIENCE

Data Scientist | Nutrient Life Limited
Mar 2025 – Present

- Engineered an end-to-end customer churn prediction model using Python (scikit-learn), achieving 87% accuracy.
- Architected and deployed 12 enterprise Power BI dashboards consumed by stakeholders weekly, reducing reporting turnaround time from 5 days to 4 hours.
- Optimized SQL queries across PostgreSQL databases, improving average query execution speed by 68% and cutting server load.
- Partnered with the Risk & Compliance team to develop a real-time fraud detection dashboard, flagging 1,300+ anomalous transactions monthly with a 94% precision rate.
- Presentation of reports to the stakeholders, ensuring that our findings were effectively communicated and that the insights generated were actionable.

Machine Learning Engineer | Reliance Intelligence Limited (Ad-hoc)
Jan 2025 – May 2025

- Trained a YOLO object detection model on a dataset of 18,000 labelled manufacturing images, reaching 88.6 mAP@0.5 and reducing false-positive defect alerts by 41%.
- Constructed an automated data augmentation pipeline that tripled the effective training dataset size and improved model generalization on out-of-distribution samples.
- Annotated and quality-reviewed 4,000+ images in Roboflow and Ultralytics, establishing annotation guidelines adopted by two additional project contractors.
- Architected a real-time recommendation engine using convolutional neural networks and approximate search, reducing latency by 38%.
- Presented weekly progress updates to the CTO and engineering lead, synthesizing model metrics and business impact into clear, non-technical summaries.

Data Scientist Fellow | SAIL Innovation Lab *May 2024 – Oct 2024*

- Perform in-depth exploratory analysis to uncover patterns, trends, and anomalies and predict for informed decisions.
- Develop and apply statistical models and machine learning algorithms to predict business outcomes.
- Collaborate with business teams to identify opportunities for data-driven decision-making.
- Communicate insights effectively to both technical and non-technical stakeholders.
- Proactively communicated with stakeholders, reducing ambiguity in audio content and achieving the overall satisfaction benchmark of the project, and analysed the data.

Data Analyst | Branta Consult *Feb 2022 – March 2024*

- Analysed transaction data for daily payment events using SQL and Excel, identifying and reconciling discrepancies and collaborating with Finance to resolve 97% within SLA.
- Developed a weekly KPI scorecard with the Operations team, standardizing performance metrics and enabling data-informed SLA breach interventions.
- Supported the analytics team in cleansing and restructuring the customer database, improving data quality scores from 71% to 96%.
- Built interactive Excel dashboards for the vendors division, enabling branch managers to self-serve daily performance metrics for the first time.

Asst. Project Manager NISCOPS - GIZ (TOMAPEP) (Ad-hoc) *Oct.2020 – Nov 2021.*

- Spearheaded end-to-end project planning, execution, and delivery for multiple cross-functional projects, achieving a 95% on-time delivery rate.
- Coordinated with stakeholders to define project scope, objectives, and deliverables, ensuring alignment with organizational goals.
- Identified and mitigated project risks, maintaining project quality and timelines.
- Researched valuable information on environmental and climatic conditions to support farmers in making informed decisions, contributing to a 15% reduction in climate change-related crop losses.
- Coordinated and led project stakeholders, fostering collaboration and alignment of efforts.
- Developed robust database management systems, including data collection and analytics platforms, improving the accuracy and quality of farm produce and resulting in a 98% reduction in data errors.

EDUCATION

Data Science Bootcamp | SAIL Innovation Lab *2024*

MSc Human Resources Management | Federal University of Agriculture, Abeokuta *2021*

B.A. Agricultural Administration | Federal University of Agriculture, Abeokuta *2015*

PROFESSIONAL CERTIFICATIONS

- Microsoft Certified: Power BI Data Analyst Associate 2025
- Datacamp Certified: Associate Data Analyst 2024
- Foundation Entrepreneur Business School (FATE Foundation) 2023
- Public Research Ethics (TRREE) 2023

KEY PROJECTS & ACHIEVEMENTS

Real-Time Sales Intelligence Platform

- Engineered a live sales dashboard integrating 2 data sources via APIs and SQL views, reducing C-suite reporting preparation time by 80% and enabling same-day strategic pivots.

Predictive Customer Churn Model

- Built a random forest to predict loan defaults with 91% AUC-ROC, deployed into the credit review workflow, and reduced the loan defaulter.

Sales Performance Analytics Framework

- Designed a customer model analysis that enabled targeted retention campaigns, contributing to a 19% improvement in 12-month customer retention rates for the segment.
